The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21, ~~29~~, 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hot Pepper Wax - *2000 in view of Dowie et al.

Hot Pepper Wax contain Castor oil, and is designated to repel Moles, However, it is in liquid form. Dowie repels vermin, with hot pepper, but applies it on insert solid matrices of line, iron (col. 1) or coal (col. 2) and sprinkles it wherever vermin are troublesome.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made desiring to utilize the wax hot pepper to control moles, ~~and~~ other vermin, to combine it with Dowies' preparations in order to readily distribute it wherever moles and rats are found.

Claims 30, 32-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
